

## **Town of Hubbardston Policies**

### ***Buy Recycled Policy***

This policy encourages all departments, board and committees to purchase products made from (or in part by) recycled materials.

As a community, we commit to purchasing recycled options if the following conditions existed:

- a. The recycled product is readily available at the same quantity
- b. The recycled product meets Federal standards for recycled content
- c. The recycled product can be substituted for a comparable non-recycled product; and
- d. Recycled product costs do not exceed the costs of non-recycled products by more than 10 percent.

For this policy, "Recycled Paper" means a product with not less than:

- a. Fifty percent of its total weight consisting of secondary waste materials; or
- b. Thirty percent of its total weight consisting of post-consumer waste

Adopted: June 26, 2000
